

Resource Sheet

Name - Rajarshi Mitra

Roll - 81 Sem - 5th

Subject - Software Engineering Lab

Subject code - ESC591

4) A) Consider the following table

Task Name	Duration	Dependency	Resource
T ₁	4	-	R ₁ , R ₂
T ₂	7	-	R ₃
T ₃	10	T ₁ (FS)	R ₄
T ₄	9	T ₂ (FS)	R ₅
T ₅	5	T ₃ (FS), T ₄ (FS)	R ₁ , R ₂
T ₆	8	T ₅ (SS)	R ₅
T ₇	5	T ₅ (FS), T ₆ (FS)	R ₅

Standard rates of resource are : R₁ = \$10/hr, R₂ = \$12/hr and R₃, R₄, R₅ = \$15/hr

Calculate the usage of the resources (in hours) with assigned task and determine manufacturing cost of the project and market price to achieve 15% profit.

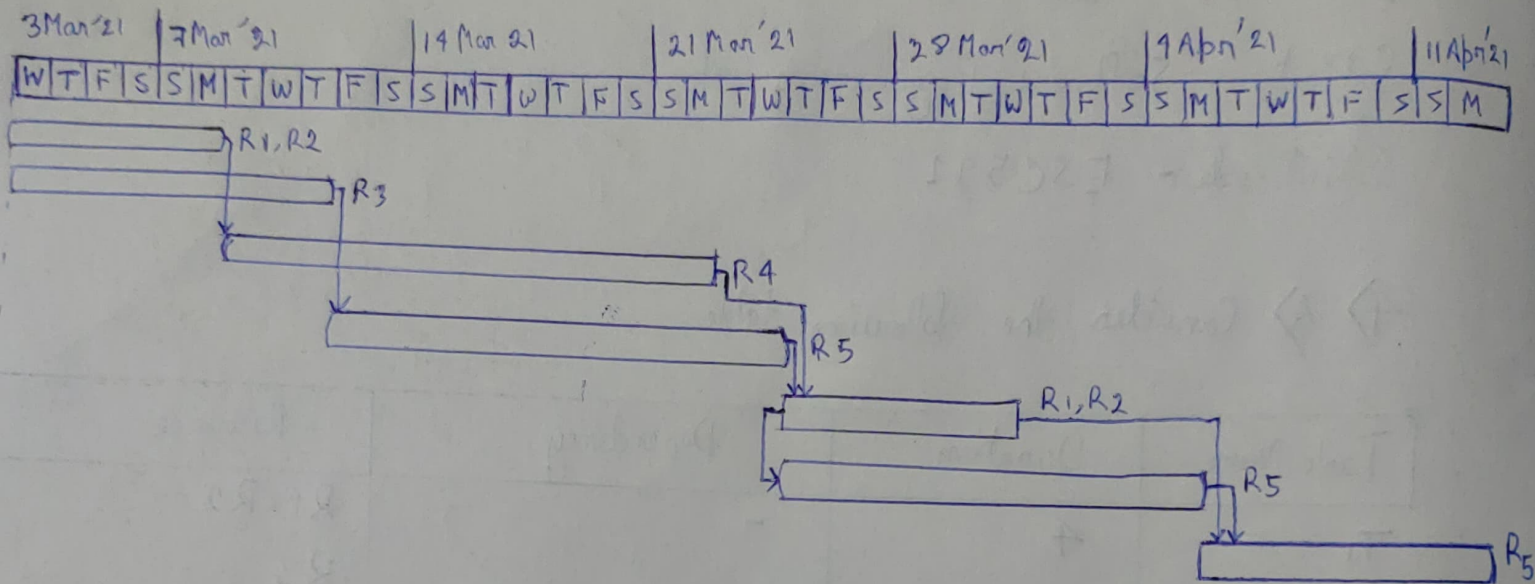

B) Draw a sequence diagram of online course registration system.

Ans → A)

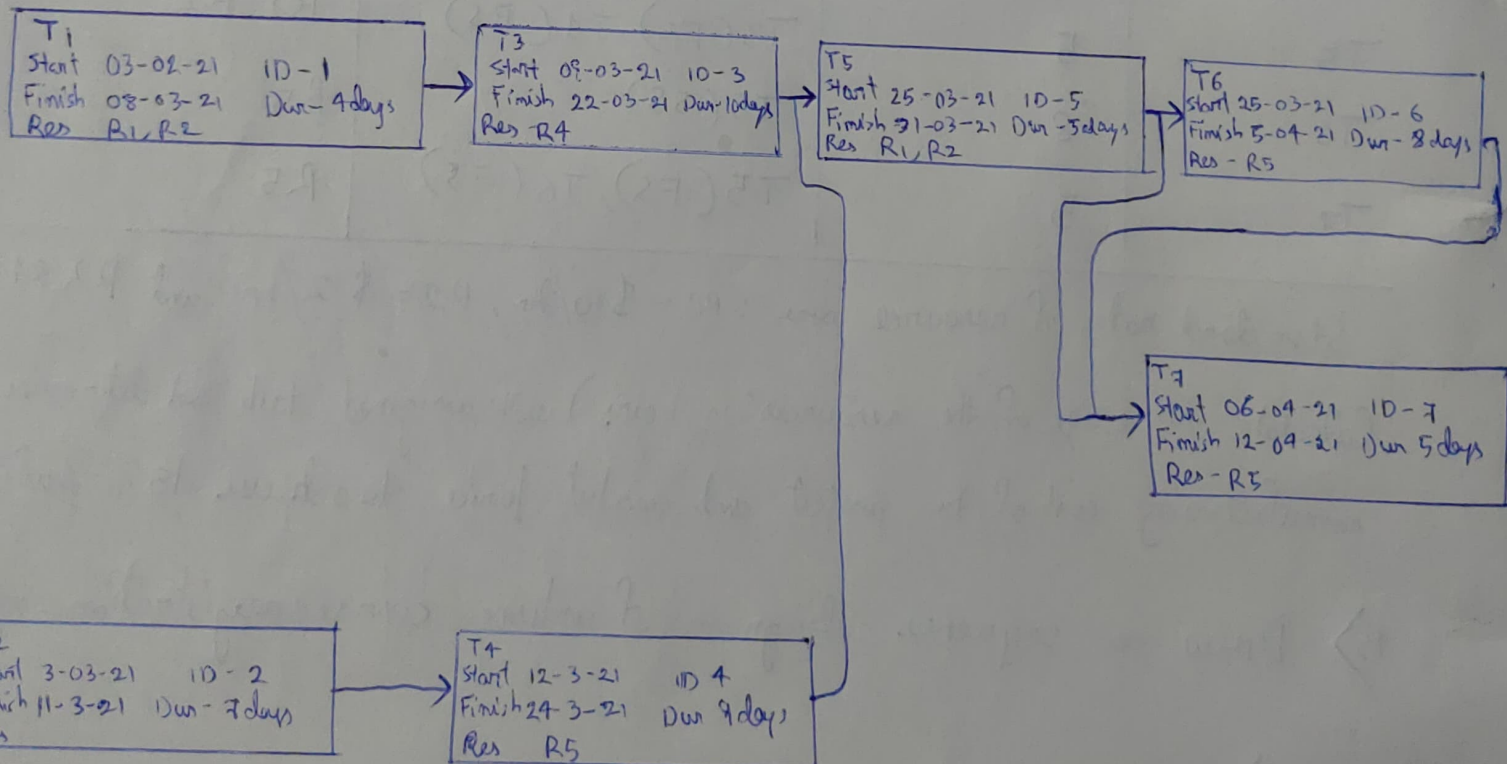

Entry Table:-

Task Name	Duration	Start	Finish	Predecessors	Resource Names
T ₁	4 days	Wed 03-03-21	Mon 08-03-21		R ₁ , R ₂
T ₂	7 days	Wed 03-03-21	Thu 11-03-21		R ₃
T ₃	10 days	Tue 09-03-21	Mon 22-03-21	1	R ₄
T ₄	9 days	Fri 12-03-21	Wed 24-03-21	2	R ₅
T ₅	5 days	Thu 25-03-21	Wed 31-03-21	3, 4	R ₁ , R ₂
T ₆	8 days	Thu 25-03-21	Mon 05-04-21	5, 5	R ₅
T ₇	5 days	Tue 06-04-21	Mon 12-04-21	5, 6	R ₅

Gantt Chart :-

Network diagram :-

Usage of resource in hours :

Resources

Total cost = hours \times std rate

R₁

$$72 \times 10 = \$720$$

R₂

$$72 \times 12 = \$864$$

R₃

$$56 \times 15 = \$840$$

R₄

$$80 \times 15 = \$1200$$

R₅

$$176 \times 15 = \$2640$$

$$\text{Total} = \$6264$$

In this project manufacturing cost is = \$6264

For 15% profit, market price will be = \$ ~~720~~ 7203.6
